Falcon Freight – Business Service Level Agreement

1. Scope

This agreement covers business account customers using Standard, Priority and Enterprise support plans. It describes response times, delivery commitments and service credits.

2. Support plans

Standard plan: support by email, first response within 8 business hours. Priority plan: email and phone support, first response within 2 business hours, named account manager. Enterprise plan: 24/7 phone line, first response within 30 minutes for critical issues, quarterly business reviews.

3. On-time delivery commitment

Falcon Freight commits to delivering at least 95% of Standard domestic shipments within the published delivery window each calendar month. Enterprise customers get a 97% commitment.

4. Service credits

If on-time delivery falls below the commitment in a month, the customer receives a credit on the next invoice: 5% of that month's freight charges for each full percentage point below the commitment, capped at 25%. Credits must be requested within 30 days of the end of the month. Credits are the customer's sole remedy for late delivery.

5. Exclusions

Delays caused by customs holds, incorrect addresses provided by the customer, force majeure events, public holidays, or shipments containing prohibited items do not count towards the on-time calculation.

6. Incident severity

Critical: tracking or booking systems unavailable for all users. High: a single customer cannot book or track shipments. Normal: questions, reporting requests and minor issues. Critical incidents are updated every hour until resolved.

7. Term and termination

The agreement runs for 12 months and renews automatically. Either party can terminate with 60 days' written notice. Outstanding invoices remain payable after termination.
